S.No 1542/1 · Keela Thiruthangal [15] · Sivakasi

scale 1:250 — print at 100% on A4

SHAPE: THE DRAWING — sides closed to the 1:366 sketch's angles, 0.24° from it

north up · every length in feet

SCALE 1:250 — 1 mm on paper = 0.25 m = 0.82 ft on the ground

0 5 10 15 20 25 m

this bar is exactly 100 mm — check it with a ruler; if it differs the print was resized

S.No 1542/1 · areas by offsets

every length in feet

SHAPE: THE DRAWING — sides closed to the 1:366 sketch's angles, 0.24° from it

north up

Two rectangles and four right triangles

piece	sides (ft)	area = base × height	area ft²	cents	m²
triangle DPX	DP 59.85, PX 85.26	½ × 59.85 × 85.26	2,551.6	5.86	237.1
rectangle PQYX	PQ 14.79, PX 85.26	14.79 × 85.26	1,261.3	2.90	117.2
rectangle QRBY	QR 44.47, RB 85.26	44.47 × 85.26	3,791.9	8.70	352.3
triangle RCB	RC 30.49, RB 85.26	½ × 30.49 × 85.26	1,299.8	2.98	120.8
triangle XYA	XY 14.79, YA 21.07	½ × 14.79 × 21.07	155.9	0.36	14.5
triangle YBA	YB 44.47, YA 21.07	½ × 44.47 × 21.07	468.6	1.08	43.5
TOTAL		**adds back to the plot**	**9,529.1**	**21.88**	**885.3**

Letters: A at the top, then B, C, D clockwise. On the FMB these are D = corner 3, C = corner 4, B = corner 2.

Corner angles: A 99.71°, B 135.03°, C 70.32°, D 54.93°.

Registered Hect 00 Ares 8.50 = 850 m² = 9,149.3 ft² = 21.00 cents.

The same four sides, closed other ways

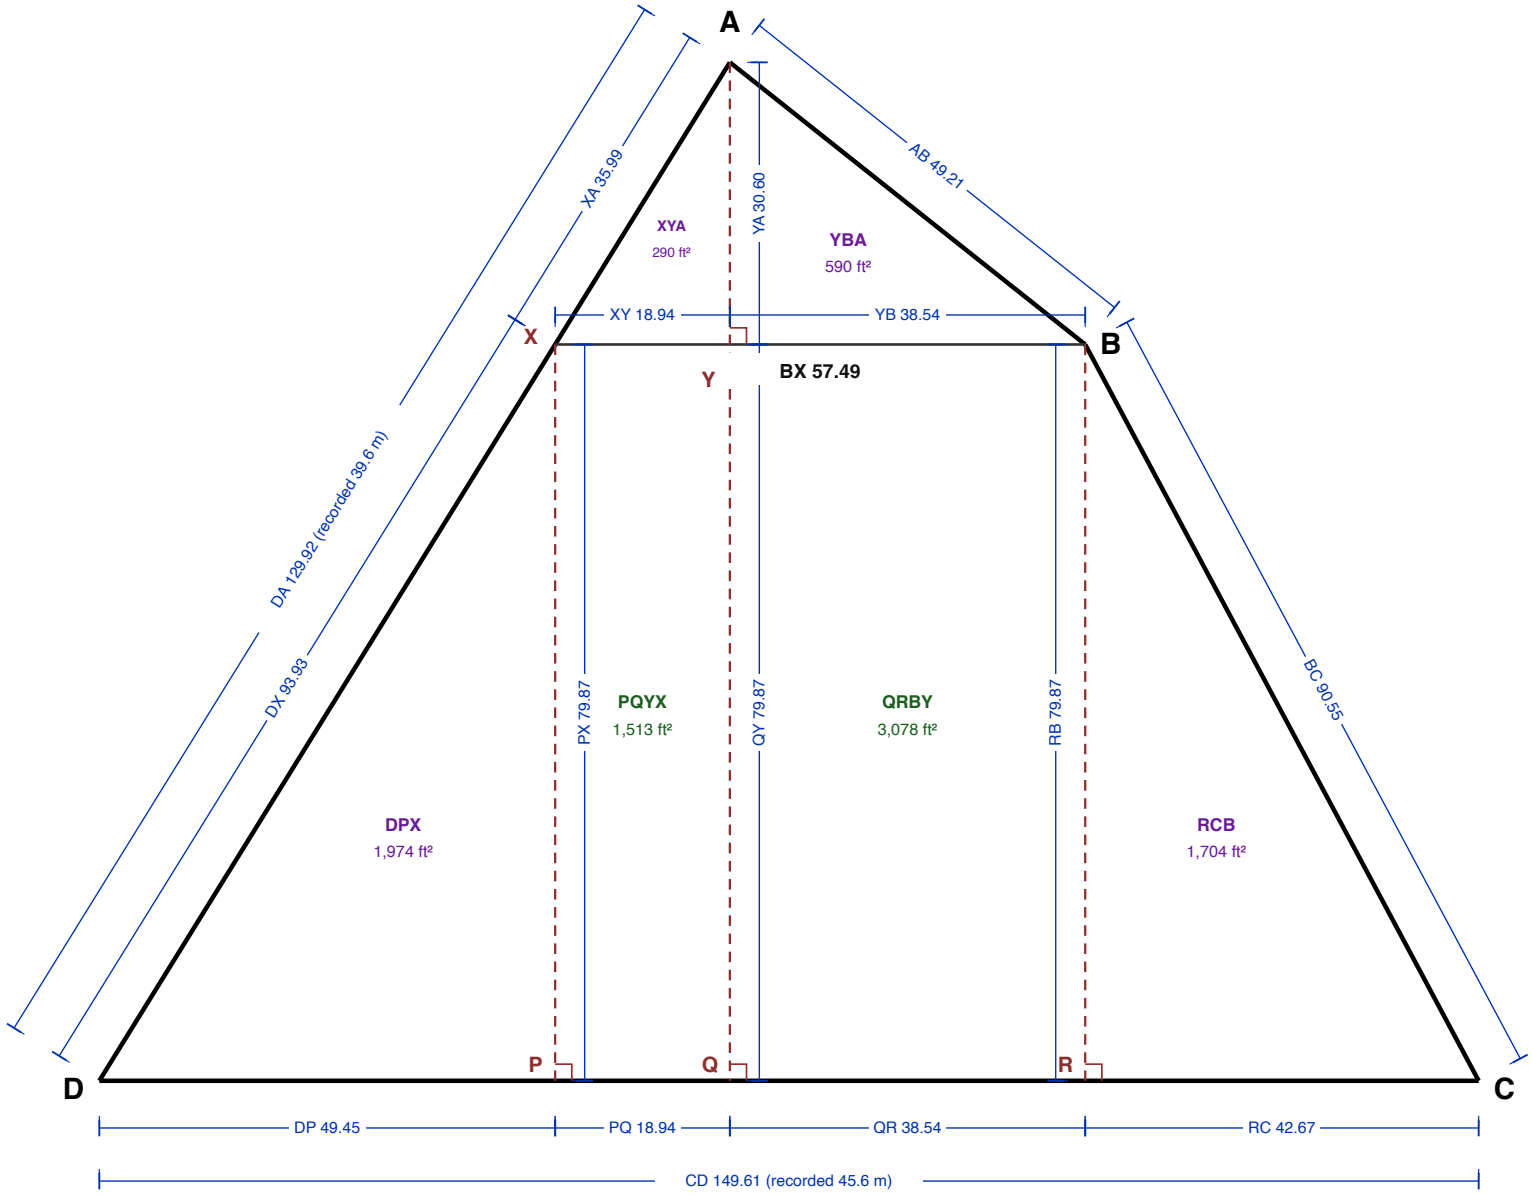

drawing	9,529 ft² = 21.88 cents	fits the sketch to 0.24°
register	9,149 ft² = 21.00 cents	nearest 850 m² shape, 14.3° off the sketch
cyclic maximum	9,563 ft² = 21.95 cents	the most these four sides can hold
